Hi Bo.

Thank you for that information. I don't need the labels, but thank you for the offer.

We found imiprothrin on avocados. Probably from imiprothrin used in the warehouse. Our program (PDP) will consider these as violations.

Thank you for your time and help!

Best regards, Diana

I hope all is well. There 21 products currently registered that contain imiprothrin as an active ingredient, however they are all labeled for non-food uses. I can send you the EPA registration numbers if you would like to review the labels on PPLS. Let me know if you have any other specific questions.

Enjoy your day.

**Subject:** Imiprothrin (insecticide)

Hi Diana,

I asked Marietta, the branch chief of IVB1 where Imiprothrin is managed in OPP. Marietta pointed me to Kable "Bo" Davis. He's a busy person so I was not able get time with him yet. I have copied him here and his office phone number is 703-306-0415. I did let Marietta know that USDA is interested in finding out if there are US registrations for use even though there aren't tolerances yet. Also, USDA would be interested if there are pending tolerances, right?

Bo – Diana's phone number is 202-572-8167 if you get a chance to call her that would be great.

On a personal note: I will be in and out now for the little while as my father-in-law did pass away last night, peacefully. I will be trying to keep up with my email as the server allows me offsite access. I normally don't do the electronic introductions like this but for purposes of time I thought I would try to expedite it like this. Sorry for any misunderstanding.

Peace, David
